POST /upload

Create a new city recommendation.

Body parameters (multipart/form-data)

Name	Type	Description
cityname	string	The name of the recommended city.
citysummary	string	The simple introduction of the recommended city.
attractions	string	Recommended attractions of the city, as a comma-separated list.
photo	file	The photo of the city.

Example request

```
curl -F cityname='Durham'
     -F citysummary='The capital city in County Durham.'
     -F attractions='Durham Cathedral, Computer Science Building, Tesco'
     -F 'photo=@path/to/durham.jpeg'
     'http://XXX.XXX.XXX.XXX:YYYY/upload'
```

expected response: status code 200

GET /ideas

Return the information of the recommended cities.

Example request
```
curl http://XXX.XXX.XXX.XXX:YYYY/ideas
```

Example responses

```
[
  {
    "cityname": "Lorem",
    "citysummary": "Lorem ipsum dolor sit amet.",
    "attractions": "Lorem, Ipsum, Dolor, Sit, Amet",
    "photo": "0f44480ceeb8e21b772f258f4d42ddb6"
  },
  {
    "cityname": "Durham",
    "citysummary": "The capital city in County Durham.",
    "attractions": "Durham Cathedral, Computer Science Building, Tesco",
    "photo": "91b3d2e03d930cf99a7d1210f922744c"
  }
]
```
